

 **GAUNTLET**

WHITEPAPER

Introduction

Gauntlet is a new and exciting gaming client emerging soon to the gaming world. It will be one of the first platforms to reward gamers for playing their favorite games. This gaming / cryptocurrency based project aims to change the experience of gaming and put true passion back on the map for gamers everywhere!

Connect, Engage, Reward!

Gauntlet will provide unique products and services for gaming and cryptocurrency enthusiasts along with specific client functionalities and features to empower Gauntlet Users. The platform endeavors to be one of the first ever gaming/cryptocurrency platforms to launch a fully integrated suite of services all under one roof.

What is Gauntlet?

Gauntlet is a new gaming project developed by the tech newcomer, Silver Titan Limited. According to the company, it's the gaming client everybody's been waiting for! Players will be able to purchase games, accessories and other store items, access streaming services and participate in ESport events. In addition, users can integrate their existing desktop games to the client and plug into the client's rewards system. Users can also donate GAU to their favorite friends or steamers or anybody that has the Gauntlet client downloaded.

Gamers can also enjoy unlimited audiences and even create their own ESport events amongst their friends or communities and interact with everybody in more ways than just text chat. Gauntlet has a learning portal where users can plug into courses and programmes that promote gaming and technology-based career paths.

We at Gauntlet are not only interested in your playing skills and time spent on our client, we also want to help you thrive through learning, recognition awards and educational opportunities all planned in our Gauntlet Academy.

**The Future is Bright
at Gauntlet ESport!**

The GAU-client

The dashboard

The Dashboard is what every user will see when they first open or load their client. It's essentially a snapshot of the player's financials with rich data filter options, progress charts, holdings, top players, games and more.

Library and store

The library will contain all the games that users purchase and will be listed in order of favorites and preferential play. Existing games that were integrated from your desktop will also be here. These games will be added to the rewards algorithm so you can earn rewards on them too.

From bestsellers to new releases, pre-orders, high and low-cost games in different genres to gaming gift cards, subscriptions, software and much more, Gauntlet will offer access to thousands of products for users to choose from. Our GAU token, will be used within the Gauntlet ecosystem. More usability and details will be announced in successive client updates.

Rewards

Gauntlet offers a unique rewards system that combines cryptocurrency, points and game related rewards. Users can gauge their progress from game type, earnings to date, play time and time left until their next reward. GAU rewards will be based upon game-time, activity progression, currency value and other parameters.

The client has an integrated wallet into the rewards tab of the client so users can withdraw to their wallets if they wish or use their rewards to purchase other services and products within the client. All activity and game rewards will be linked to the market value of GAU, available tokens and activities achieved.

Esports

Users can view ESport events diaries, watch their favourite events and even create their own ESport tournaments. Why not create your own event for fun with your own friends.

If you are 100% serious about Esports, we will have a host of design options, parameters and elements users can use to drill down and create customized professional events, which can be shared on social media using our social sharing features which will be coming soon. These features will be rolled out in a series of progressive updates.

Create your own events and offer GAU as rewards!

Stream, Dream, and Team with GAU!

Community building

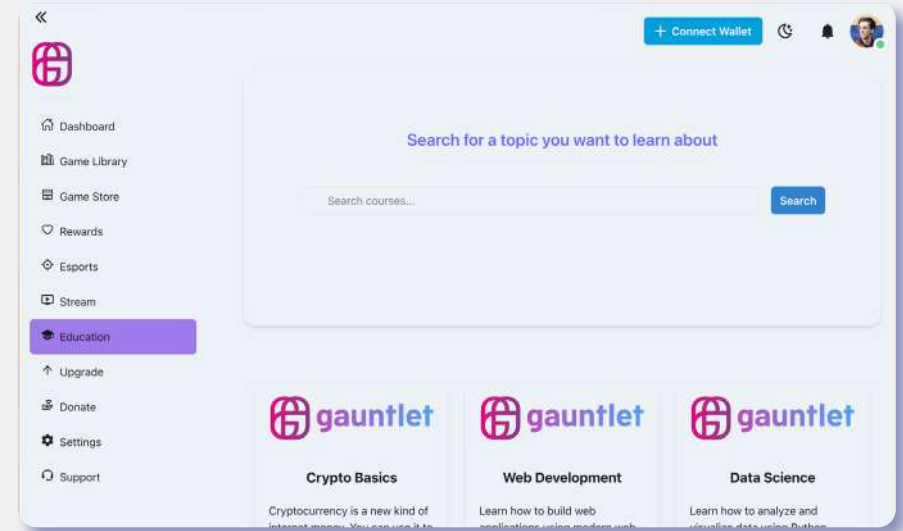

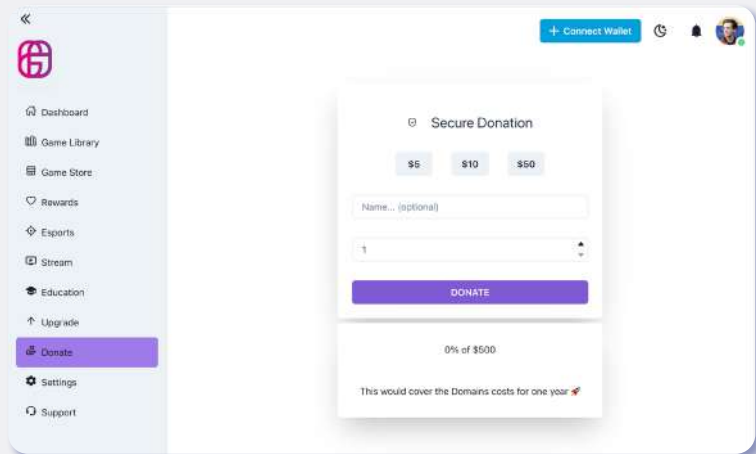

Want to build a community? Start streaming and showcase your skills to an unlimited global audience, accept GAU donations and engage with your viewers via chat box with our streaming features. Those wishing to stream can also get rewards through donations, advertising their own products on their channels etc.

Revenue sharing will also be available to streamers at some point in 2024 onwards. Don't want to stream? No problem, choose from a host of streamers across the GAU and other gaming networks and select the one for you to watch and support.

Donations

Users can both accept and donate GAU p2p. Simply just select the amount and put in the username of the recipient and proceed to click the donate button. It couldn't get much easier than that.

Future releases will have more additional integration features into other client tabs to prevent tab hopping. We may in the future also look at other token types to include in later client versions.

Education

Our learning portal is a very exciting addition to our client offering. Users will be able to select from a range of courses delivered through our educational partners so that users can progress careerwise within the gaming industry. These courses will begin as stand-alone courses but we plan to make them progressive so that users can start at a very basic level and work their way up to more advanced content and eventually certification.

The Growth of Esports

Esports have experienced rapid growth in recent years, with more players, fans, and sponsors getting involved every day. In fact, some estimates suggest that the industry could be worth over \$1 billion by 2025.

This growth can be attributed to several factors, including increased investment, better infrastructure, and improved technology. Additionally, the COVID-19 pandemic has accelerated the growth of Esports, as more people turn to online gaming and streaming for entertainment.

Why Gauntlet is unique

Gauntlet is the first gaming platform that rewards gamers for their time, loyalty and activity. The client caters for multiple services in one client, namely; gaming, streaming, ESports, game store, learning courses and community support features.

Gauntlet rewards are real cryptocurrency rewards. GAU will have a global value or value possibility where it can be traded, exchanged or donated and can be used to purchase items, upgrades and much more within the Gauntlet ecosystem.

Gauntlet will reward gamers for game-time and not just rewards after completing a number of purchases or reaching specific levels, you actually get rewarded GAU to play!

Earn GAU just by playing!

Gauntlet is forward thinking!

Gauntlet values its members and will update its members weekly on developments, new releases or team news and will focus a large emphasis on user feedback to improve the quality and experience of the client going forward.

We value our users and their education so we are aiming to integrate a Gauntlet academy and other services to improve the impact gaming has on people's lives. It's not just about playing, it's about learning and fulfillment! Gauntlet cares very much about social responsibility to its users and plans to implement safe and efficient systems to ensure that play is fair, moderate, enjoyable and most importantly healthy.

Income Streams

Games including but not limited to - Bestsellers, latest releases, preorders, bargain sales, gaming gift cards, gift cards, subscriptions and software.

Gaming hardware including but not limited to - Gamepads & Controllers, Sony PlayStation 4 & 5, Console Accessories, Nintendo Switch, Microsoft Xbox One, Retro games and related consoles, headsets, microphones and all gaming peripherals.

Advertising Partnerships - Companies who wish to advertise on both our website and in-client promotional spaces.

Game Testing Partnerships - Gaming companies who are looking for places to test their games by seasoned gamers within a reliable and supportive gaming community. Both gamers and Gauntlet would be rewarded.

Monthly Silverback GAU subscriptions - the Silverback low-cost subscription can be paid from earned rewards or additional GAU purchases.

Future based subscriptions - such as a proposed Gauntlet Education programme and associated partnerships services.

Sales from GAU token - Users purchasing tokens to upgrade their rank to the Silverback monthly subscription or use to purchase items from the store or to donate to other players/streamers or to hold.

Streaming Revenue Share - Users can partner up with their favorite streamers and support them monthly using a revenue sharing model which Gauntlet will receive a percentage every month.

Tokenomics

Gauntlet (GAU) is built on the Binance Smart Chain, a powerful and efficient blockchain infrastructure that enables secure and fast transactions. The token contract ensures the integrity and functionality of Gauntlet within the ecosystem.

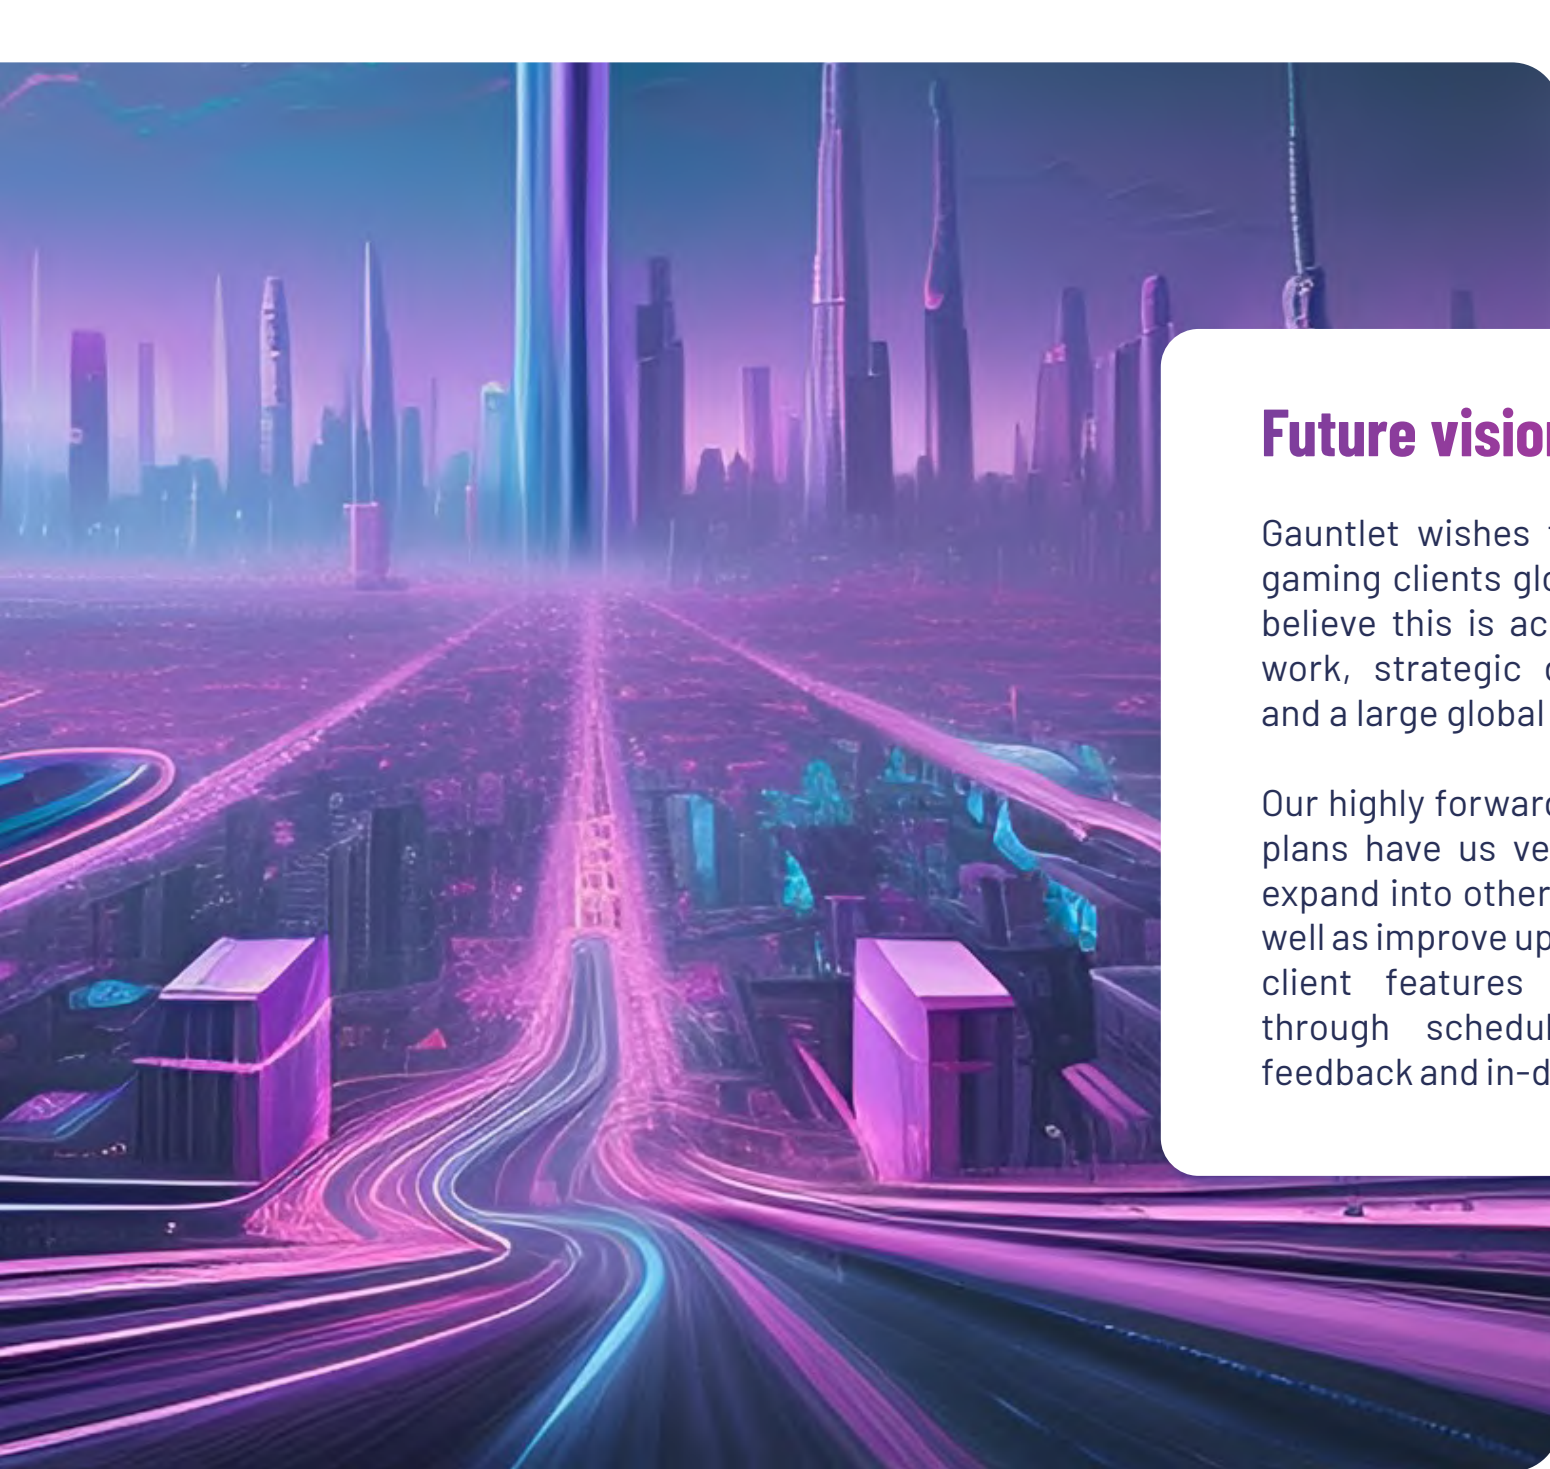

With a total supply of 10 million GAU tokens, Gauntlet offers a carefully managed distribution to support its long-term growth. The maximum supply of 100 million GAU tokens sets the boundaries for future token issuance, ensuring controlled inflation and value preservation. Gauntlet (GAU) tokens are divisible up to 9 decimal places, providing flexibility in transactions and facilitating precise value transfers. This high level of divisibility allows for micro-transactions and ensures optimal scalability within the Gauntlet ecosystem.

As a holder of GAU tokens, you become an integral part of the Gauntlet community, gaining access to various features and benefits. Whether you participate in liquidity pools (LPs), stake your tokens, engage in gaming activities, or explore business opportunities, Gauntlet offers diverse avenues for community members to contribute and be rewarded.

Future vision

Gauntlet wishes to become one of the top gaming clients globally within 5-10 years. We believe this is achievable only through hard work, strategic development, partnerships and a large global marketing initiative.

Our highly forward thinking and development plans have us very excited and we wish to expand into other gaming related avenues as well as improve upon and upgrade our existing client features and associated services through scheduled releases, community feedback and in-demand driven technologies.

Gauntlet's Forward-Thinking Initiatives

Here are some of the areas Gauntlet is already looking into:

Gauntlet Academy - Education has always played a large part in the Gauntlet Teams approach to problem solving and creativity so it's no surprise that Gauntlet are interested in looking into how gaming can play a part in real-life problem solving through various real-time on demand-based learning curriculum and courses aimed at students from all levels and ages.

Cryptocurrency Ecosystem - As the blockchain ecosystem grows over the next few years, Gauntlet will be seeking out new partnerships and avenues to advance the utility of cryptocurrency in gaming and will look into potentially accepting other tokens/coins as well as create/support other sustainable utility-based tokens within the gaming niche.

Gauntlet Client Upgrade - The Gauntlet client will release a series of upgrades as more client development features are enhanced and added to, over the duration of elemental design and implementation. This will result in users receiving a richer gaming experience and a much more efficient use of their favorite client features.

Gauntlet Secure Data Network - User data is very important and we are looking into plugging our database into a decentralised database network. This will allow users to have more control over their data, access it faster and ensure that their data is safe from intrusion or centralised leaks anywhere and at anytime.

Gauntlet Roadmap for 2023

Q1

- 2023 Business Strategy Plan
- Business Manager Hire
- Client Prototype Review
- Market Research
- Competitor Analysis
- Mojo Mascot Redesign
- Social Media Platforms
- Cryptocurrency Partner sites
- Gauntlet Mission Statement
- 2023 Gauntlet Roadmap

Q2

- Solidify Development Team
- Web3 Game Development
- Gauntlet NFT Collection (Baseline)
- Top Player Reward Client Integration
- Gauntlet Academy Blueprint
- Hire Marketing Manager
- Graphic Design Department
- ESport Team Partnership Plan
- Investor Outreach
- Market Research

Q3

- New Website Release
- Updated Whitepaper Release
- Increase Team Size
- Updated Roadmap
- Rebranding
- Resume Weekly Updates
- Tokenomics
- Marketing Plan
- E-Sport Team Partnerships
- Client Rebuild

Q4

- Fully Functional Client Release
- Client Testing
- Client Launch
- Hiring Additional Developers
- GAU Client Business Model Scaling
- ESport Tournament Event Scheduling
- Venture Firm Partnerships
- GAU Community Building
- Social Media Partnerships
- Next GAU Client Release Blueprint

Conclusion

Gauntlet combines the key areas of gaming, puts them into one platform, rewards users for using a new and exciting cryptocurrency and offers them educational opportunities to advance their careers in gaming.

Players get rewarded to play and can, subsequently use their rewards to purchase games, upgrade their subscription, donate to their favourite streamers and more. The sky's the limit! Gamers don't just want great games, exciting experiences, ease of use and social interactions... they want to be rewarded for their time and energy also!

All-in-one gaming client solution like no other!

As technology grows, the employment market will change and will point more towards online work placements and virtual hiring. Virtual jobs will become a new norm. Gaming and cryptocurrency are two industries that will thrive in the coming years so it won't be surprising when huge employment opportunities start emerging from there.

Rewards in cryptocurrency, in addition to more traditional type-based rewards such as; gift cards, free games, passes etc... provide far more safer and anonymous features to protect people's identities and the whole operational ecosystem. Gauntlet wants to enter the marketplace initially to grow a very much dedicated community while it develops its flagship product and associated services.
